# Parsifal, the Legends Researcher

**Erasmus+ Programme**  
**Strategic Partnerships for school education**

## Context

European policies in education focus, among others, on basic skills such as literacy, numeracy, science. These are identified as the foundation for further learning and a gateway to employment and social inclusion. The results of the PISA survey, the OECD's Programme for International Student Assessment, showed that almost one out of five 15-year-olds in the EU has insufficient reading and writing skills. This is a serious threat in a social and economic environment dominated by the written word, both online and in print, where individuals can contribute and participate actively only if they are able to appropriately read and write.

School education plays a strategic role to provide students with the necessary reading and writing skills to foster the awareness of the challenges and potentials offered by new technologies.

## Needs and Objectives

Within this context the project identifies the following needs and related objectives to be achieved:

- Improvement of secondary school students' achievements in literacy and digital skills making reference to the cultural heritage surrounding the students that will have to be presented to other European students through the reference to traditional tales and stories that are linked to it.
- Promotion of a multidisciplinary approaches in education based on references to be made to historical, cultural, geographical and artistic issues in the presentation of the local cultural heritage of the students.
- Promotion of a learner-centred pedagogical approaches where each single student involved in the project - supported by their teachers and the project experts - will find his/her own way to present sample of the local cultural heritage to other European students involved.
- Integration of ICT in the learning process as the presentation of the samples of the local cultural heritage will be made through the development of an online interactive map as well as an App.
- Exploitation of new forms of flexible learning based on an appropriate use of ICT as the project's deliverables will be available online and on mobile. It will therefore be possible for the students involved to learn about the European cultural heritage of the regions involved, presented referring to traditional tales and stories by other students, via their computer and via their mobile telephones.
- Creation of a transnational network of secondary schools that will be directly involved in the project activities as associated partners. The schools will actively be involved in the research activity and the production of the deliverables to be compared at transnational level. The schools will be encouraged to continue the activity also beyond the Parsifal project, in the framework of eTwinning projects that will possibly start as it already happened in the

framework of previous European projects with schools in which the partnership was and is involved.

### **Intellectual Outputs**

In order to achieve the above mentioned aims the following outputs will be delivered:

1) On-line Repository of legends and traditional tales related to the cultural heritage of the regions involved in the project. The repository will be available both in English and in the national language of the country. The repository will present the legends and tales through different media (videos, photos, texts). The repository will be searchable according to different criteria such as country (i.e the partner countries), topic (e.g. art, history, tradition etc); artistic subject (e.g. palace, sculpture, painting, object etc).

The Repository will contain, for every traditional tale and legend linked to the local cultural heritage a:

- Collection of videos, images and hypertexts;
- Collection of cultural and historical references;
- A transnational comparative analysis aimed at identifying the common European roots of the different geographical areas involved.

2) Essays on European legends, myths and traditional tales related to the cultural heritage. The traditional tales and legends presented in the on-line repository and the related interactive map will be analysed and compared at transnational level in order to identify the common European roots. This will also develop a sense of belonging to a United Europe. The results of the transnational comparative analysis will be presented in the related Essays.

3) On-line Interactive map – also available in mobile as an App – where it will be possible for the student to identify the hot spots where there are places/objects with a cultural relevance that are presented through the legends and traditional tales related to them according to the media and approaches described above (i.e. photos/videos/hypertexts, relevant references, transnational analysis).

## The Context

- Young people make an extensive use of the technical potential of ICT based devices. .
- This, without appropriate guidance, might lead to insufficient reading and writing skills.
- The educational system needs to teach how to exploit technologies as a mean to promote and reinforce literacy skills, benefiting from their attractive potential.

---

---

---

---

---

---

---

---

## Objective

The objectives of the Parsifal project are:

- to use ICT to allow students to improve literacy
- To acquire the knowledge of the cultural heritage surrounding them
- To carry out a comparative analysis with the cultural heritage of other European areas.

### Description of the organisation

Centre of Vocational and Continual Education (CKZiU) in Sosnowiec, Kilińskiego 25, was established in June 2013 under the resolution of the City Council of Sosnowiec, integrating 9 technical and vocational schools, together with a school for disabled students and general school for adults. CKZiU focuses on education of youth, tutoring various vocational courses, organising vocational exams and certifications, vocational counselling and cooperation with employers and organisations. In 2016/17 school year, CKZiU is educating 1324 students (41 disabled) in 42 vocations, 21 on technical level. They do not only learn general and vocational subjects but also undergo practical training in local companies - the school has signed cooperation agreements with Promet, Arcelor Mittal, Renault Tandem, Peugeot L'Emir, Janus, PKP PLK and others. The programme of students' vocational training is continually updated, according to the dynamic changes of local job market. CKZiU is a school that cares about the best laboratory equipment and modern school workshops, often sponsored by the companies where students do their practical training. CKZiU received cars and equipment for our workshops from car dealers, multimedia labs, professional language labs and many others.

Teachers working in CKZiU are a diverse group, from young, starting their career to mature specialists. They create a dynamic team complementing each other with innovation, experience, methodology and directions of development. The school has recently introduced an electronic diary that helps us to contact the parents, the contact between other teachers, head teachers and enables the permanent monitoring of student's attendance and results.

### Experience of the organization in previous European projects

To expand its educational offer, since 2006 CKZiU has been coordinating and participating in numerous European projects under Socrates, Comenius, Leonardo da Vinci, Gruntvig POWER and Erasmus+ projects:

### Experience and Expertise of the organization in the project's subject area

Apart from vocational subjects, CKZiU educates youth in literature, history, civics, subjects connected with culture and tradition. Moreover, our teachers organize various extra-curricular activities and workshops during which students can develop their talents and interests in these fields (theatre workshop, literature contests, public books reading, poetical and literature events for foster homes and pensioners' homes, and the like)

### Contributions that can be provided to the project

CKZiU is an experienced institution in implementation of projects under the "Long Life Learning Programs" and POKL. Summing up the experience developed in the period between 2006 and 2014, CKZiU realized the following projects: 11 two-year mobility projects, one LDV project partnership, a study visit and pilot project VETPRO-Com. CKZiU continued the good practice with 3 projects of vocational training for students, 1 project for teachers' development and 1 in strategic partnership. In 2017 CKZiU has already applied for a project for vocational training for students, a project for vocational development of teachers and accreditation in European Voluntary Service.

CKZiU's experience, related to the implementation of EU projects, allowed it to implement support for the institution itself, students and staff for obtaining measurable results in the acquisition of new linguistic, social and cultural skills. In addition, thanks to the experience in EU projects, CKZiU ensured the development of the school and its position on the local education market.

CKZiU takes up a challenge imposed by national and European labour market - to prepare students for professional and social life - this is its mission. School management focuses on continuous development and improvement of teaching staff, in order to meet the requirements of the education market - provides, coaching, individual counselling; analyses the difficulties associated with use of new procedures and rules in the current work.

### Reasons of involvement in the project

The idea of the project addresses problems that we, as a school, face in the context of educating youth. Their level of literacy is decreasing, mainly due to the excessive use of modern media. We believe that the combination of modern IT device as a tool and culture and tradition as topic is a successful way to evoke interest in reading among young people.

### Contact Person's Experience and Expertise

Ewa Bartosińska – vice head teacher, supervises the projects' realisation, expenses and financial clearance, writes projects and coordinates them for CKZiU. One of the projects she wrote and implemented receives a Star Project award. She has a diploma in economy and postgraduate studies in European funds management.

### Description of the organisation

Zinev Art Technologies Ltd. is a company developing, implementing and managing European projects and providing consultations in the spheres of culture, art, Internet-based activities and education, VET, e-learning and school education development, as well as regional development. ZAT team has a long-term experience in implementing successful EU projects under the LdV, eLearning and Lifelong Learning programmes. ZAT also provides school administrations, SMEs, NGOs and local authorities with EU project development/implementation and regional development services and trainings. ZAT is a part of a network of school and VET partners throughout the country, developed and maintained under the "eTalent" (2007 eLearning programme), "Michelangelo" (2008, LLP), "OnAir" (2009, LLP), "I am not scared" (2010, LLP), "Archilandia skills" (2013, OP Human resources development) and "Goerudio" (2014, LLP) projects.

ZAT is an experienced organization with a broad scope of collaborators and partners within the country and abroad, which will be made available for the benefit of the project.

ZAT has built, tested and is currently applying a successful approach in organizing the participation of particular active parties on behalf of the involved targeted organizations – trainers, trainees, interns, unemployed people, interested in getting a new type of qualification and hence employment opportunity;

ZAT has already participated in projects using media and ICT resources for educational purpose (OnAir & REVIT);

ZAT has a team of experts, who have been involved in activities directed at studying youth training needs and suggesting approaches and methods for development of successful training programs, but also paying special attention to matching the needs of the labor market with the services offered by the educational system at school level.

### Experience of the organization in previous European projects

In 2017 ZAT started working on the GoScience project – focused on enhancing comprehension in science teaching and learning (goscience.eu), DoWellScience project – focused on developing an application and desktop online system to help students and teachers to study and teach sciences in high schools (dowellscience.eu), SWOT project – focused on WBL in the field of enogastronomy and tourism (swot.pixel-online.org)

In November 2016 ZAT started implementing the "Excellence in VET" project – Change management forwarding to excellence in vocational educational institutions. The project is focused on both experience exchange among VET institutions and practical implementation of identified change management. It emphasizes continuous growth and improvements at organizational level in a long-term vision, identifying not only effective ways to be shared, but also weakest approaches to be changed and improved by learning from each other practices. Website: <http://evet.lv>

In January 2014 ZAT started implementing the Goerudio project – **Promoting science education**. The Goerudio project, funded by the European Commission in the framework of the Lifelong Learning Programme – KA4. The project's contractor is Riga State Technical School (LV). The Goerudio project aims to promote scientific knowledge at all level of education by implementing innovative strategies.

### Experience and Expertise of the organization in the project’s subject area

ZAT implemented the “ARCHILANDIA SKILLS – SUPPORTING THE FUTURE THROUGH RESTORATION OF THE PAST” project, which was supported under the operational programme “Human resources development” during 2013-2015. We worked with a network of VET providing partners around the country, which will be involved in the present project as well. We have long-term interests in the field of tangible and intangible heritage and our team was involved in the implementation of the “FOCAL” LLP project, which used culture and traditions for creating communication bridges between different generations.

The activities we carried out under the “Archilandia skills” project included:

1. Research: cultural and architectural resources of the territory, restoration skills and crafts as a solution for improving the employment opportunities and territorial management at an EU level.
2. Transfer of a training program for provision of services in the sphere of evaluation of cultural and architectural heritage of the territory, qualification for restoration and maintenance of the local architectural heritage, based on the ARCHILANDIA approach, opportunities for using new technologies for organizing these services.
3. Promotion and dissemination of information on the project results, exchange of information, good practices and experience.
4. Exchange of program and project managers, project team members, trainers and experience on site.

We have also implemented intangible heritage and traditions researches, we interviewed representatives of older generations, restored memories and spread them among younger generations (done in the framework of FOCAL project part of which ZAT team was). The project aimed to explore and reveal similarities and differences between countries, exchange of cultural experience, present the culture and maintain intergeneration dialogue between youth and seniors. This was shown through the following components: Culture and cultural heritage, Traditional meals and customs, The old traditions associated with nature and its monitoring, The landscape and architecture: cultural heritage and the present values of the most beautiful areas of the country, Religion, Intellect and art, Each country in the world (as a state and its representation of what it is famous in the world).

### Contributions that can be provided to the project

ZAT's team has worked in the project subject area from different perspectives and can contribute with skills and knowledge of what is considered to be cultural heritage, how people connect to it, how the European and international community and authorities work on the topic. We have also put into practice different approaches for study of cultural heritage and protection of it.

### Reasons of involvement in the project

There is a number of sources for investigation of ethnic culture, such as written, iconographic, audio sources (songs and chants), various studies (customs, traditions, rituals). However, the challenge in modern society does not relate to the sources for investigation, but to the new ways for disseminating the cultural (especially the intangible one) heritage not only within our own countries but throughout the world. One of the biggest drawbacks of the research of ethnic culture is that it is often confined only within a certain country and nation, without caring or even expressing interest in neither distant cultures nor immediately adjacent neighboring cultures. At times when Europe is struck by attack after attack of crises, appreciation of the other's ethnic culture will be one of the important steps for understanding that all nations are an inseparable, inherent part of Europe and the world. All nations and countries have a place in this world and the world would be a much better place if each and every one of us is open and willing enough to share and learn about the others. We would like to contribute to the process of knowing better different cultures and respecting them.

### Contact Person's Experience and Expertise

**Zornitsa Staneva – skills and experience**

A master in BA and international economic relations Zornitsa is an experienced project manager with a number of successful pilot, TOI and valorisation projects under the LdV 2000-2006 programme. Since the year 2007 she has participated in a number of new EU projects, among which: "eTalent" /eLearning/, "Michelangelo" and "OnAir" /Comenius, LLP/, "REVIT" /KA3, LLP/, "I am not scared" /KA1, LLP/, „Innovative approaches for identifying and responding to VET needs of disadvantaged youth" /OP Human resources development/ and the "Archilandia skills: Supporting the future through the restoration of the past" /OP "Human resources development"/ project. Zornitsa is also an external expert with the Ministry of agriculture and foods and has been providing expertise for the formation of a number of local action groups under the LEADER approach.

**Dr. Miglena Molhova-Vladova – skills and experience**

Miglena, doctor in economics, shares the same experiences under EU projects. Miglena has studied carefully and implemented successfully the entire scope of project life, including project development, implementation, reporting and organizing everybody's work as a target oriented team. Miglena is very experienced in developing and implementing valorization initiatives and her strengths in dissemination and exploitation will be quite valuable under the current project. Her educational background and 15 years of experience as university professor and pedagogical materials developer will also be invaluable for the successful project implementation. She is an expert in scientific (research/development) activities with focus on training programs and methodologies.

#### Description of the organisation

Istituto Superiore Statale "E. Montale" is a high school in Genova with 1830 students (15% are foreigners) and 174 teachers. The main Courses concern Economy, Foreign languages and Tourism.

The school organizes stages and training events in cooperation with different companies and it also has a traditional experience both in international exchanges and projects; some important past projects were Comenius, Leonardo da Vinci projects and Transfrontaliero (theatre in Liguria, Sardinia, Corsica and Tuscany). Our school enhances the development of an open mind and supports all the projects which involve international and intercultural experiences.

Istituto Superiore Statale "E. Montale" is located in the east side of the city, with pupils from families with different cultural and economic backgrounds.

Our city is Genova, with a beautiful harbor and beautiful beaches, and was declared a UNESCO World Heritage Site. We are about 30 minutes from Portofino and Santa Margherita to the East and about an hour from San Remo to the West. The study of foreign languages is a priority for our city and especially for our school.

### Experience and Expertise of the organization in the project's subject area

Mythology and national or international traditions have always been part of our school programmes. The classes are used to comparing and contrasting literary works from different countries and historical periods. All our classes know how to use ICT software and have created some good products as the result of their experiences both at school and during foreign stages, in the form of videos, power point presentations and other products. All our students are used to working in mixed abilities groups and with partners from different classes and different schools, both in the classroom and online.

### Contributions that can be provided to the project

Due to the wide variety of mythological and folkloristic characters, considering the great literary and artistic tradition of our country, we are confident that we can provide some interesting and valuable ideas to the project.

### Reasons of involvement in the project

Italy has a long tradition in mythology and folklore. Every region has its own typical tales and traditional characters even though they all share a common ground in classic culture. As part of the European Union, we believe that it is important for young people to understand that we belong to a greater community notwithstanding our differences.

### Description of the organisation

Kaunas Jonas and Petras school is located in Kaunas city. Kaunas Jonas and Petras school implements pre-school education (3 to 6 years), primary education (7 to 10 years) and basic/secondary education (11 to 14 years). ~900-950 pupils are studying in the school. The school is fully funded by Kaunas city municipality. The students are continuously involved in projects and curriculum activities encouraging to investigate local traditions and environmental heritage. Majority of the learning activities involve active use of ICT. Teenagers like to document and present their explorations using ICT tools and teachers are experienced ICT users for teaching and learning.

School vision: Modern, open to change, innovative and safe school, oriented in to developing students' abilities and values while preparing them to be a part of fast and changing modern society.

School mission: To provide preschool, elementary and secondary education service to students guided by democratic and humane, principals.

Ensuring variety after class activities, including school students and their family members, giving opportunities to be a part of project based activities with other school members and social partners.

### Experience of the organization in previous European projects

School, as project partner, develops the project "Nordic Baltic Learning Environment for Movement Affordances" under NordPlus programme. The project seeks to continue and develop the project of North-Nordic - Baltic Physical Activity Bridges and Baltic States activities. The aim of the project is to apply innovative methods for promoting physical activity while working with elementary and elementary school students. The important group in the project are pupils aged 6 to 14 years, because in this century it begins to express physical passivity, which later leads to health problems. Collaborating with schools, universities and the non-governmental sector organizations aim at developing a methodology for promoting physical activity, adapting both internal and external environments for active movement. In 2015 school was nominated as Microsoft showcase school, 9 teachers became Microsoft education experts.

### Contributions that can be provided to the project

- Participation in research in the project and developing intellectual outputs
- Administration of the project activities and finances ensuring correct management, as well fluent collaboration with project coordinating and managing institutions.
- Involvement of associated partners/beneficiaries and other needed institutions of the project and ensuring collaboration with them.
- Producing needed reports
- Participating in project dissemination, evaluation, quality ensuring activities
- Developing project results and other needed activities

### Reasons of involvement in the project

We seek to achieve the aim and objectives related to the project and to develop activities together.

We also seek to get and to share our practise and experience with other European institutions.

Within the project we seek:

- Improvement of our school students' achievements in literacy and digital skills making reference to the cultural heritage surrounding the students that will have to be presented to other European students through the reference to traditional tales and stories that are linked to it.
- Promotion of a multidisciplinary approaches in education based on references to be made to historical, cultural, geographical and artistic issues in the presentation of the local cultural heritage of the students.
- Promotion of a learner-centred pedagogical approaches where each single student involved in the project - supported by their teachers and the project experts - will find his/her own way to present sample of the local cultural heritage to other European students involved.
- Integration of ICT in the learning process as the presentation of the samples of the local cultural heritage will be made through the development of an online interactive map as well as an App.
- Exploitation of new forms of flexible learning based on an appropriate use of ICT as the project's deliverables will be available online and on mobile. It will therefore be possible for the students involved to learn about the European cultural heritage of the regions involved, presented referring to traditional tales and stories by other students, via their computer and via their mobile telephones.
- Creation of a transnational network of secondary schools that will be directly involved in the project activities as associated partners.

As well for teachers, researchers, students benefit will feel on rising their qualification (to teach and train students on project's topics, to develop activities together).

## Description of the organisation

EuroEd Foundation came into being as an organisation in 1992, with the support of the Soros Foundation and the British Council Romania. EuroEd Foundation is a non-profit organisation located in Iasi, Romania. EuroEd it delivers educational services to all age categories and developed a series of programmes, including language courses and international training courses for language teachers and professional trainings in field of tourism, IT, mentoring, communication, etc.

EuroEd's relevant experience lies with co-ordinating and participating in over 100 EU funded projects, as well as in strategies and methodologies of co-operation at local, regional, national and trans-national level. Projects implemented are in the field of: learning languages for specific purposes, online resources, educational materials, games and drama techniques, networks, employability, development of competences for job profiles, social inclusion, medicine, motivation and support, promoting quality in developing European projects, sports, social responsibility and volunteering, etc.

With passion, professionalism and consistency, we have gained the statute of being the most important non-governmental educational institution in north-eastern Romania. We are a founder member of QUEST (The Romanian Association for Quality Language Services), which is an associate member of EAQUALS (the European Association for Quality Language Services). Our projects have been awarded European distinctions of the highest level: 10 international awards in the last years for the quality of its projects: 9 European Label Awards and a Worldaware distinction. Two of the projects led by EuroEd were selected by the EU Commission as examples of best practices in its collection called LINGO.

Mission Statement - EuroEd Foundation aims at supporting the reform processes of civic society by promoting high-quality standards in accordance with European Community requirements in the field of education, civil society, public policies, youth, law, culture, mass media, and regional development. Through its initiatives, EuroEd Foundation intend to act as a regional catalyst for debating and developing regional and international projects which should facilitate exchange of ideas and experience in the field of democracy and European Integration.

## Experience of the organization in previous European projects

In 1998, also as a result of constantly growing services and addressability, we founded Centre for European Integration, through which until now, EuroEd Foundation co-ordinated and implemented over 100 national and international educational projects.

Projects implemented are in the field of: learning languages for specific purposes, online resources, educational materials, games and drama techniques, networks, employability, development of competences for job profiles, social inclusion, medicine, motivation and support, promoting quality in developing European projects, sports, social responsibility and volunteering, etc.

Centre for European Integration promotes activities oriented towards educational, public, social, business, juridical and cultural policies aiming at improving the provision of educational services and products, of economic policies, supporting the social categories at risk, defending human rights and strengthening regional cooperation. The projects coordinated and implemented by the Centre for European Integration serve the needs of the community and are circumscribed or complement the range of specialized services provided by the other departments of EuroEd Foundation.

EuroEd's current and past projects are focused on:

### Online Language Learning:

**ELSTI – European Languages for Secretaries.** The project focused on developing skills in business communication and cultural awareness in the following languages: English, French, Italian and Spanish. (Leonardo Da Vinci – Transfer of Innovation)

<http://www.eurobusinesslanguageskills.net/>

**TOOL TIPLS – Tool to improve transparency of professional foreign language skills.** The aim of the project was to develop the tool to improve transparency of professional English language (as lingua franca) skills in the selected target sectors of the Hospitality industry. (Leonardo Da Vinci – Transfer of Innovation) [www.tool-tipls.eu](http://www.tool-tipls.eu)

### Online Learning Networks for Foreign Language Study:

**LRE - Language Rich Europe.** The project will carry out professional research that will result in an innovative and interactive measurement tool called the "Index of Multilingual Policies and Practices in Europe". This Index will help visualise the role of and support for multilingualism in the participating European countries and highlight good practice. (KA2 Languages - Multilateral Networks) <http://language-richblog.eu/>

**APLANET - Autonomous 'Personal Learning Networks' for Language Teachers.** APLANET is a European Union funded project to help language educators who are not yet using social networks to understand: What are social networks for language educators?, Why they should use them?, How they can get involved?. (KA2 LANGUAGES - Multilateral Projects) <http://aplanet-project.org>

**ISPY – Online Networking Platform for Language Learning.** The main output of this project is the development of an online networking platform for learning languages. The platform allows interaction between learners from different countries who will work together to learn a new language via problem-solving challenges and tasks in an authentic and real time setting. #### Experience and Expertise of the organization in the project's subject area

For the efficient implementation of the project EuroEd will bring the following competences:

- experience in European projects
- experience in developing non-formal learning methodologies, instruments and activities
- experience in researching processes
- experience in creating videos based on real life situations, testimonials, interviews
- experience in developing trainings through innovative and interactive methods
- experiences in language teaching and language experts
- establishment of strong partnerships with schools, teachers, students
- experience in promoting the use of the ICT in educational process
- experiences in activities to promote local traditions, cultural and historical heritage

Experience gained from implementation of related projects:

- Art as the identity of a country and as a universal pattern which all the European countries can share

The aim of the project (partners from Romania, Poland, UK, Portugal, Germany, Greece, Italy and Turkey) was to give a European context to adult education in every participating institution, and therefore to strengthen European citizenship. Activities carried out during the project worked towards a better understanding of the European countries, cultures and traditions, based on development of videos and visual materials for the following themes: Traditional Handicrafts; Traditional Pottery and Interior design; Traditional Food and Drinks; Traditional Dance and Folk Music; History; Traditional clothes; Architecture.

- My Story - creating an ICT-based inter-generational learning environment (<http://www.mystories.eu/project/>)

The MyStory project records interesting stories from older people's lives. The sorts of things that may be lost if not recorded in some way. And who better to record the stories than younger people, eager to learn first-hand about their own social history. The stories are being collected in five European countries each representing their own unique people and unique history.

- ACT! Active & Responsible Citizen= Flourishing Future Society

Project aims to reach active community members who want, can and have what to say, are ready to take actions on issues they care about and through their activities inspire other members of the local community to act, by using the theatre techniques of Augusto Boal.

Objectives: raise awareness that any kind of the manifestation of active citizenship can lead towards improvement of the life of the society; show that volunteering either on a global or community level contributes to personal development and to learning skills and competencies, that people involved in civic actions benefit themselves; motivate people to participate in civic actions invoking a variety of art forms in order to increase their civic responsibility.

#### Contributions that can be provided to the project

One of EuroEd's goals, when engaging in a project, is to develop project deliverables which benefit the clients and beneficiaries of the organization. Thus, the deliverables of projects developed are piloted, streamlined and adapted as necessary to the use of the beneficiaries of the departments of the institution. By doing this, EuroEd aims to have a strategy of development which always relies on innovation and consolidation of EuroEd Foundation as a carrier of innovative good practices for the services it delivers.

## Reasons of involvement in the project

**Cultural Competency** - It is the integration and transformation of knowledge about individuals and groups of people into specific standards, policies, practices and attitudes used in appropriate cultural settings to increase the quality of services, thereby producing better outcomes

In the school setting, it involves the ability to acquire knowledge of education-related beliefs, attitudes and practices to improve student achievement. It is a developmental process occurring along a continuum from cultural destructiveness to cultural incapacity to cultural blindness to cultural pre-competence to cultural competence to cultural proficiency.

To encourage culturally competent and linguistically appropriate exchanges and collaborations among families, professionals, students, and communities. These collaborations should foster equitable outcomes for all students and result in the identification and provision of services that are responsive to issues of race, culture, gender, and social and economic status.

In Romania the study of the local traditions, cultural and historical heritage is a subsidiary of other disciplines and is not a strength of the Romanian educational system. Various topics, such as teaching and learning about sensitive heritage, the museum experience and authenticity, colonial heritage, and expressions of the past in public culture is being reached by extracurricular activities. Also teachers are trying to complement the school curricula with interactive workshops and panel discussions developed these themes further through concrete examples from practice.

Skills that can be improved by the students by being involved in this project:

- Identify and openly discuss cultural differences and issues.
- Gain respect of individuals who are culturally different themselves.
- Challenge oppressive systems and serve as an ally to those being oppressed.
- Use cultural knowledge and sensitivity to defend the rights and values of individuals and groups.
- Accurately assess one's own multicultural skills, comfort level, growth, and development.
- Use verbal and non-verbal (body language) responses to communicate with diverse individuals and/or groups.
- Resolve conflicts in culturally appropriate manner.
- Use multiple viewpoints in problem-solving.
- Employ critical thinking skills.

### Attitude/Awareness

- Believes that differences are valuable and that learning about others who are culturally different is necessary and rewarding.
- Is open to change, and believes that change is necessary and positive.
- Willing to self-examine and, when necessary, challenge and change their own values, worldview, assumptions and biases.
- Is personally committed to justice, social change and combating oppression.
- Accepts other worldviews and perspectives and are willing to acknowledge that, as individuals, they do not have all the answers.
- Believes that cultural differences do not have to interfere with effective communication or meaningful relationships.

## TEMPLATE: PM2.B – HOW TO WRITE THE BEST PRACTICE DISSEMINATION REPORT

Please identify **at least 1 'best' dissemination event** you carried out and which you feel are innovative or could provide a good example for other partners and projects.

Please be aware that you should identify and describe a specific dissemination event you carried out and not just describe the typology of dissemination event which you consider relevant.

For the dissemination event, please specify:

- The place and date where and when it took place
- The target groups and the number of participants involved in the event
- The outcomes of the event
- Feedback received by the participant
- Follow up of the event
- The reasons why the event can be considered examples of best practice

Please do not answer the element above one by one, but make a description of the dissemination events taking into consideration all of them.

Please produce the description of the event in the third person.

E.g.: *The best dissemination event carried out in Italy is the organisation of conference on the thematic area of the project. The conference took place in Florence on November 2018. The participants in the event were*

### EDITING INFORMATION

**TITLE OF THE REPORT [ARIAL 14 POINT, BOLD, CENTRED]**

**AUTHOR NAME(S) [ARIAL, 12 POINT, BOLD, CENTRED]**

NAME OF INSTITUTION [10 POINT, NORMAL, CENTRED]

CITY, COUNTRY [10 POINT, NORMAL, CENTRED]

*E-MAIL [10 POINT, ITALIC, CENTRED]*

**ABSTRACT [ARIAL 12-POINT, BOLD, CENTRED]**

*The text of the abstract should be written in italicized text, using Arial 10-point. Text is fully justified. Leave two blank lines after the abstract, and then begin the main text.*

The main body of the text should be written using the Arial font and single spacing with 10-point interlining spacing. Be sure your text is fully justified—that is, flush left and flush right. Please do not place any additional blank lines between paragraphs.

All margins should be set at 2.5 cm

The citation number of a bibliographical reference in text must be enclosed in square brackets, for example [1]. A list of the references should be given at the end of the paper.

Figures, tables and graphics should be centred, numbered and accompanied by a legend. (Fig.1. Legend, Table 1. Legend). Where possible Arial 10-point should be used for all figures, tables and graphics.

Please, avoid using page numbers, headers and footnotes.

#### **1. FIRST-ORDER HEADINGS**

For example, “1. Introduction”, should be Arial 12-point boldface, initially capitalized

#### **1.2 SECOND-ORDER HEADINGS**

As in this heading, they should be Arial 11-point boldface, initially capitalized
